EDUCATION:

University of North Carolina at Charlotte, Charlotte, NC

August 2022 – May 2026

Bachelor of Arts in Computer Science | Concentration: Human-Computer Interaction | Minor: Economics

Honors: Dean's List (Spring 2024); Chancellor's List (Fall 2024 – Spring 2025)

Chukyo University, Nagoya, Japan

September – December 2025

Study Abroad Program | Coursework: International Business & Economics, Japanese Language

TECHNICAL SKILLS:

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS | Responsive Design

Backend & Data: REST APIs, Python, Django

Tools & Workflow: Git, VS Code, Figma, Responsive Design, Component Architecture | Agile/Sprint Development

EXPERIENCE:

SideMindLabs

January 2026 – Present

Full Stack Developer | Early-Stage Startup Team, Charlotte, NC

- Built reusable, typed React components using TypeScript to improve maintainability and reduce runtime errors.
- Managed client-side state and asynchronous API data flows to ensure consistent UI rendering.
- Implemented AI-powered content features by integrating external APIs into the frontend architecture.
- Optimized component re-renders and improved performance through structured state updates.

Accenture

June – July 2021

Technology Pathway Intern (Mayor's Youth Employment Program), Remote

- Designed and presented a mobile application prototype to address operational inefficiencies for small businesses.
 - Conducted user and market research to inform product direction and feature prioritization.
 - Delivered final presentation to Accenture mentors and program leadership.
 - Collaborated in an agile team environment, providing and incorporating structured peer feedback.
-

PROJECTS:

Informed – AI-Powered News Platform | SideMindLabs

January 2026 – Present

Next.js | React | JavaScript (ES6+) | REST APIs | Component Architecture

- Developed core frontend features for an AI-powered news aggregation platform built with Next.js.
- Implemented AI-powered article summaries and an interactive contextual definition feature, where users can click highlighted terms to generate both standard and in-context AI explanations.
- Integrated 3+ REST APIs and managed asynchronous data fetching within a component-based architecture.
- Improved user readability and engagement by refining visual hierarchy, spacing systems, and typography using Tailwind utility patterns within a modular Next.js architecture.

SafeApply – AI Job Legitimacy Platform | UNC Charlotte

August – December 2024

Django | HTML | CSS | JavaScript | Git

- Developed responsive login, registration, and job browsing interfaces using Django templating.
 - Implemented multi-criteria filtering (location, salary, job type) to improve search efficiency.
 - Integrated AI classification outputs from backend models into frontend views.
 - Collaborated in milestone-based sprints using version control and structured workflows.
 - Improved navigation clarity and onboarding flow to support intuitive user interaction.
-

CAMPUS & COMMUNITY INVOLVEMENT:

Charlotte STARS, Northridge Middle School

Volunteer Instructor

August – December 2024

- Led an interactive presentation introducing foundational computing concepts.
- Designed hands-on activities to improve student engagement and build confidence in computer science.
